<http://www.nicomihalich.com>

Full stack software engineer with experience across multiple industries and technologies. Passionate about problem solving and understanding the why behind solutions and processes. Always open to learning new languages, taking on new challenges, and can self-start or be part of a team.

TECHNICAL SKILLS

Elixir/Phoenix, Ruby/Ruby on Rails, Ember.js, React, JavaScript, PostgreSQL, Rust, AWS

TECHNICAL EXPERIENCE

Appcues - Senior Platform Engineer, Remote (Spring 2021 - Summer 2026)

- Worked on ingesting and processing customer event data to react to user actions and perform ~4 billion real-time qualifications per day.
- Designed and built a background job scheduler/runner that handled on-demand exports, periodic jobs, and backfill tasks.
- Supported mobile SDK development by building APIs to serve content to mobile users.
- Improved and extended internal admin tools creating solutions for common Sales and Support issues.

Digital Lumens - Staff Frontend Developer, Remote (Spring 2020 - Spring 2021)

- Upgraded multiple major framework versions and significantly improved performance of Ember.js application that monitored and controlled customer facility utilities.

DockYard - Engineering Manager, Remote (Spring 2018 - Winter 2020)

- Managed a subsection of the Engineering team. Helped developers improve professionally, assisted in business development, worked on internal web applications, performed interviewing and hiring.

DockYard - Senior Software Engineer, Remote (Summer 2016 - Spring 2018)

- Full stack engineer focusing on Ember.js, Ruby on Rails, and Elixir building a variety of products for clients. Presented “Leveling up your Phoenix Projects” at Lonestar ElixirConf 2017.
- Worked in several ~4-5 person teams with a variety of clients across multiple industries as both a team leader and individual contributor.

AdStage - Software Engineer, San Francisco, CA (Summer 2013 - Summer 2016)

- Worked as a full stack engineer creating tools and features built on the AdStage cross-network advertising platform using JavaScript, Ember.js, and Ruby on Rails.
- Integrated third party APIs, collaborated on design and development of the Automate automation tool, worked with customers to identify and develop solutions to cross-network advertising problems focusing on user experience and productivity.

EDUCATION

University of Pennsylvania, Philadelphia, PA (Class of 2013)

School of Engineering and Applied Science, Bachelor of Science in Engineering (BSE)

Computer Science Major, Engineering Entrepreneurship Minor

ACTIVITIES

University of Pennsylvania

Division 1 Varsity Lightweight Rowing (September 2009 - May 2013)
